

PRODUCT OVERVIEW

AuraLED..... THE HOME OF LED LIGHTING SOLUTIONS

Since 2011 AuraLED has established itself as a market leader in LED Lighting solutions. We are continually developing our products to meet the ever-changing demands of our clients and adopting new technologies to offer new and improved solutions.

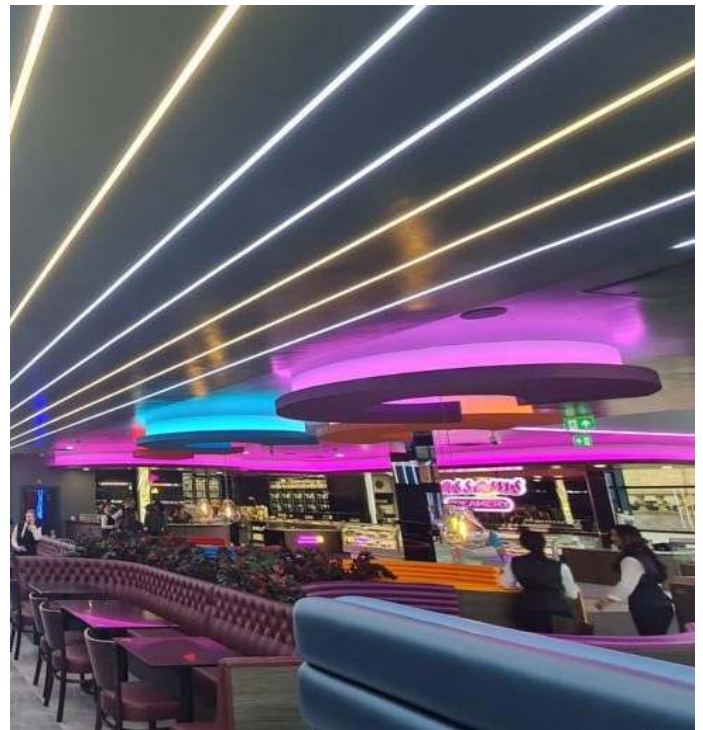

We pride ourselves on ensuring we provide a bespoke LED solution on all projects. Quality control, branded diodes, drivers and high-quality fabrication are the norm.

We are also heavily involved with DMX/RGB projects throughout the UK, where we utilise the latest smart lighting technologies such as Alexa, Zigbee and WiFi, as well as hardwire solutions using DMX 512 or Dali controls.

We are proud to offer our clients total turnkey solutions from the design stage to commissioning.

To further enhance our offering we also provide a same day cut, leading and soldering service, meaning less work for you.

We also carry out Emergency Conversions and LED Retrofits

AURASmart SMART LIGHTING TECHNOLOGY

In today's age of on-demand technology and systems, smart lighting has never been so prominent or essential, especially when it comes to display lighting.

At AuraLED, we have recognised the need to supply our customers with the latest wireless lighting solutions and offer them the technology and support they need to create the ideal lighting environment.

The AuraSMART compatible range of products meets the complex demands of today's lighting designers and installers, bringing the ability to create multi-zoned environments that can be individually programmed and controlled to create a highly flexible solution.

Our AuraSMART wireless systems utilise the global standard 2.4Ghz network, allowing users to use their existing Wi-Fi set up.

With AuraSMART you can control all the zones you want from a remote control, a phone app, or even your voice using Alexa-compatible products. AuraSMART gives the user the ability to change colour, colour temperature, saturation and brightness, enhancing any lighting environment.

Whether in the home, in a restaurant or hotel, indoors or outdoors, AuraLED can provide you with the perfect AuraSMART solution.

We are also proud to offer an extensive range of drivers for your needs. If we haven't got it in stock, we can get it for you.
